

Elite Operating Tables

**Elite Flat-Top
Operating Table**

The Elite Table is the one to choose when your needs require different table heights for different procedures or surgeons. Convenient pump-action foot pedals let you change the table height quickly and easily. Locking handle ensures the table stays at the desired height. Durable, stainless steel manual tilt mechanism with quick lock/release handle lets you change the table top angle from horizontal to almost vertical and rotate it 360 degrees to meet your needs. Select either Flat-Top or V-Top styles with or without heat. All Flat-Top table styles are available in either a 46.375-in. (117.79cm) wide model or a 58.375-in. (148.27cm) wide model. All V-Top table styles are available in either a 46-in. (116.84cm) wide model or 58-in. (147.32cm) wide model.

Our Access-A-Rail Tie-down System offers greater positioning flexibility as well as convenient access to surgical accessories during procedures.

Elite Flat-Top Operating Tables

All tables measure 46.375-in. (117.79cm) or 58.375-in. (148.27cm) wide and can be raised or lowered from 29-in to 41-in (73.66cm to 104.14cm) high x 22.375-in. (56.83cm) deep overall.
