

Instrument Tables

Choose our stainless steel Instrument Tables to keep your instruments organized and right at hand during procedures. Use it to lay out instruments in a central supply area, then easily roll it to where instruments will be used.

Constructed of Type 304 stainless steel for exceptionally easy care and long life. Choose from two styles; with a bottom cross brace or a shelf. Both styles are available in a choice of lengths and either with or without a drawer mounted beneath the top to offer greater storage capacity.

Tubular stainless steel legs are welded to top for outstanding strength.

Tubular stainless steel cross brace gives these tables outstanding rigidity while allowing for leg room underneath.

Non-marking 3-in. (7.62cm) diameter ball-bearing swivel casters let you easily roll Table where it is needed.

All welds are ground smooth and buffed to a smooth, bright polished finish.

Lower shelf lets you keep additional supplies right at hand.
