

## Redefining High Power Therapy Laser

Maximize patient care and comfort over the widest variety of conditions with a dedicated pain relief center from a company that combines decades of industry-leading research and technology.

### Practice Benefits

AlphaVet is the only Class IV Therapy Laser designed to provide your staff the flexibility to identify and treat by anatomy & symptom for the most appropriate protocol for your patient.

- **Treat By Symptom:** Priority Principle Protocols are supported by 64+ published studies to create the symptom-based approach to care and guide the patient through the body's natural healing processes.
- **Treat By Anatomy:** Accurate Dose Technology (ADT) enables you to quickly cover large treatment volumes with the most precise dose for the patient.

AlphaVet comes standard with a full suite of instantly interchangeable treatment heads and an ergonomic cart to provide your staff the versatility and mobility to treat the widest variety of patients and conditions around your clinic.

### Patient Benefits

- Confidently ensure patient comfort in a Class IV laser treatment with a device designed by the decades-long experts in laser safety.
- AlphaVet's achieves its optimal temperature profile by combining four specific wavelengths of light delivered at precise moments through a customized treatment system.
- Efficiently deliver light to larger volumes of tissue deeper into your patient in shorter treatment times without excessive surface heat.

## Specifications

Wavelength (nm $\pm$ 15 nm)	650	810	915	980
Power	0.5 - 28W			
Modes	CW, Pulsed			
Operating Power	AC and Battery			
Display	7" Full Color, LCD Touchscreen			
Overall dimensions:	11.4" x 9.5" x 10.6"			
Weight	4.5 kg			

## About Multi Radiance

Multi Radiance is a global leader in light-based technology, including medical imaging and a 20+ year focus on laser therapy. With 64+ peer reviewed articles, our commitment to research and education allows us to optimize our technology, validate our methodology, and create predictable and reproducible patient outcomes, both in-clinic and at-home.

# Features

## Accurate Dose Technology

- Intuitive, easy-to-navigate anatomical selections

## Priority Principal

- Protocols supported by 60+ published studies

## Optimal Thermal Profile

- Achieves High Intensity with High Patient Comfort

## Quad-Wavelength Design

- Targeting the widest variety of symptoms and anatomies

## Adaptive High Power

- Large treatment volumes in clinically feasible treatment times

## Specialized Heads

- Quickly switch treatment heads for precise delivery
